In order to understand our company products more expediently, please check it according to the part number.

**Electric power models** went quite popular nowadays and attracted more and more operators. We manufactured a series of 1/10 electric power models and many high quality aluminum parts.

### Notes:

- ⇒ Read and understand the instructions carefully before operating or assembling your racing model.
- ⇒ Specifications are subject to change without prior notice, and actual received model may vary from the images and/or descriptions in this manual.

**ATTENTION:**

1. To reach the speed which the data sheet mentioned as up, the motor and ESC Surface temperature can not over 75°C.
2. The situation of the ESC undervoltage protection as below: a. The models obvious decrease the speed. b. The LED1 & LED2 light of ESC not bright or Scintillation, can not on work normally. C. There is the sounds "di,di,di" from motor, can not on work normally.
3. Selected our upgrade kit to improve the speed higher than the data sheet mentioned as up.

## Features

**A1**

- 1/10th scale on-road racing car tyres feature quick on-road running performance and durable service time.
- High precision electronic speed control(SP03018) is mounted.
- Long rear body post with many holes is perfect for adjusting vehicle body level.
- Good quality oil filled on-road racing car shock absorber
- Extra large high quality front provides protection against impacts.
- Solid chassis features good performance.
- Extra large radio tray provides good stability for radio system.

---

**A2**

- New Designed Brushless Motor
- New Designed Brushless ESC(#03307)
- Full Aluminum On Road Shock Sets.
- High Quality Durable Rechargeable Ni-MH Battery Pack(7.2V,1800mAh)
- Chrome Plated Wheel Rims With Colour Sprayed.

---

**B1**

- High quality 1/10th scale off-road buggy tyres provide high off-road running performance and durable service time.
- Good quality motor RC540 is applied with motor heat proof cover.
- Stylish 1/10th buggy wing
- Buggy front bumper provides protection against impacts.
- Oil filled off-road buggy shock absorber feature high shock resistance.
- Solid wing stay and holder provide good stability of wing.
- Solid chassis features good performance.
- Extra large radio tray provides stable installment of radio system.

# NOTICE FOR ASSEMBLY

## Additional Items Needed For Running Your Model

The following items, not included in the kit unless specified, are required for assembling your model. These items are available in local hobby shops.

Read and understand all instructions carefully before assembling your vehicle.

## Tools Needed To Maintain Your Model

**G**

### Body Required:

**H1&H2**

## Use of the transmitter to control your EP vehicle...

## Battery Precautions:

1. In order to maintain good performance, we warmly recommend you to use the 1.5V alkaline batteries instead of the 1.2 V chargeable batteries.
2. The batteries may leak in the event that they are installed with wrong polarities.
3. Do not use batteries of different types.
4. Do not mix the old and new batteries.
5. Do not leave batteries if not in use for a long period.
6. Please replace batteries when power indicators are weak.

## Function Switches On This Transmitter

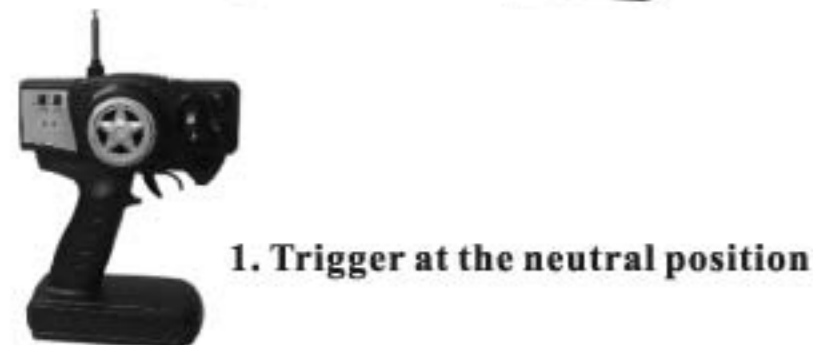

1. Throttle Reverse Switch
2. Steering Reverse Switch
3. Control Wheel
4. Steering Trim
5. Throttle Trim
6. Trigger
7. Crystal (To change please pull out)
8. Power Indicators
9. Trigger Setup Trim
10. Power Switch

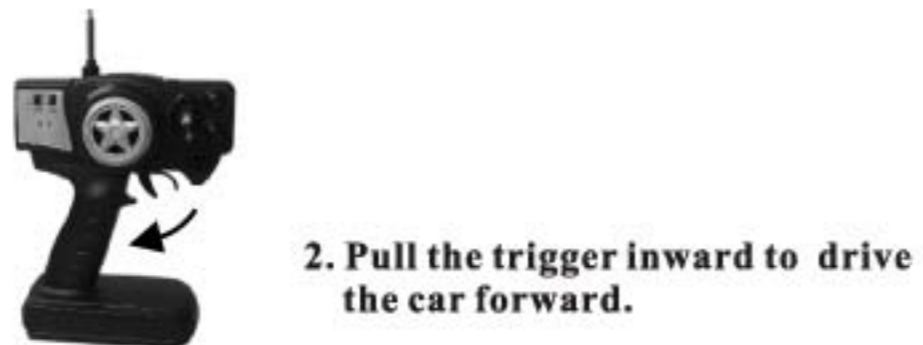

## How to drive forward, stop(break), and backward

- |                           |                                      |
|---------------------------|--------------------------------------|
| 1.Throttle Reverse Switch | 6.Trigger                            |
| 2.Steering Reverse Switch | 7.Crystal(To change please pull out) |
| 3.Control Wheel           | 8.Power Indicators                   |
| 4.Steering Trim           | 9.Trigger Setup Trim                 |
| 5.Throttle Trim           | 10.Power Switch                      |

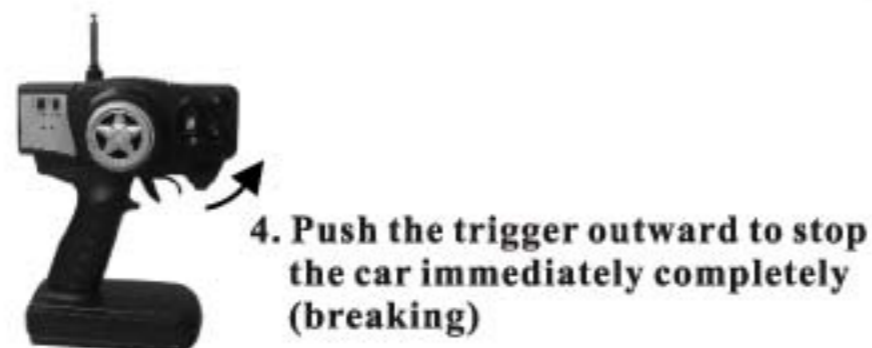

1. Trigger at the neutral position

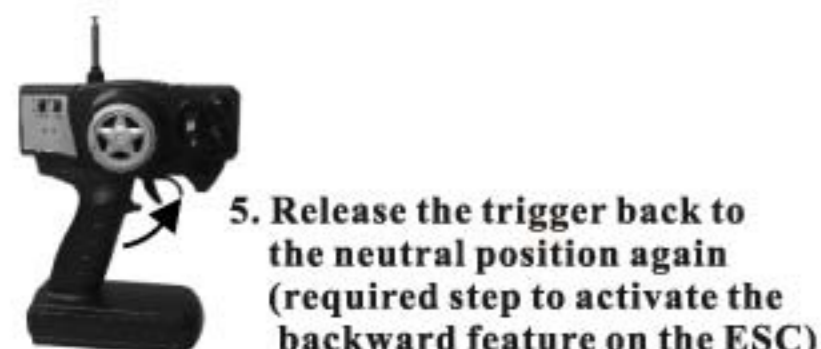

2. Pull the trigger inward to drive the car forward.

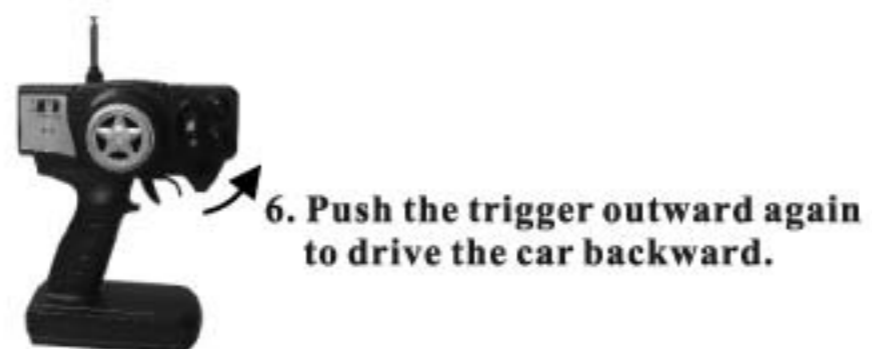

3. Release the trigger back to neutral position to slow down the car.

4. Push the trigger outward to stop the car immediately completely (breaking)

5. Release the trigger back to the neutral position again (required step to activate the backward feature on the ESC)

6. Push the trigger outward again to drive the car backward.

**ESC Reset:**  
If the Sp03018 LED blinks rapidly, this indicates the ESC is in safe mode. Hold the Reset button on the ESC for 8 seconds until the LED blinks slowly, then power off and on the power switch to restart the system.

The ESC will be in safe mode in the following situations:

1. Out of the remote control range
2. Extra low/high voltage level from the power system is detected
3. External interference signal is detected.

1. Charge the battery for 8-10 hours for the first time usage. Do not charge the battery unattended.
2. When the car is blocked, do not continue to pull/push the trigger, this will cause the ESC to overheat and damage the ESC.
